

**INDUSTRIE CELTEX**

**THE STYLE IN  
QUALITY**

**INDUSTRIE CELTEX**

*The excellence of quality and Made in Italy applied to the production of tissue paper, non-woven and dispensing systems for the professional market.*

*A process of vertical integration, from paper mill to converting, to offer specific solutions, various brands and a reliable logistical service.*

*Continuous research and development inspired by eco-sustainability to create new jobs and satisfy customer needs.*

Andrea Bernacchi  
President and CEO  
Industrie Celta

## Professional brands with multiple advantages.

**Industrie Celtex** is the synthesis of innovation, knowledge, and expertise in the tissue, non-woven and dispensing system product for the professional market.

A vertically integrated process from paper mill to converting lines offers specific **solutions** for all areas of use: washroom and workplace, food and catering, medical and healthcare. Industrie Celtex proposes distinct sub-brands to accomplish all business demands.

Celtex: the **Ecolabel** and **PEFC** certified range of product made of 100% pure cellulose fibers. The perfect solution to link high efficiency and premium quality.

▶ **Celtex E-Tissue:** the high performance environmentally-friendly paper.

The premium quality recycled tissue made from a special mix of converted pure pulp trimmings and kraft fibres. E-Tissue is a sustainable ecological line:

- Ecolabel and PEFC certified,
- no bleaching or chlorine chemicals used during the production process
- no waste and sludge pollutants from manufacturing harmful towards man or environment

Pleasant smell even when wet, E-tissue meets end-user expectations supporting the ecological choice of the premise owner.

▶ **Celtex Save Plus:** the other way to save paper

Good quality and performance range of product with a **whiteness** degree of **75%**. The paper mills exclusively use **prime quality** raw material, such as converting trimmings from pure pulp products.

This paper is ecological due to no bleaching or chlorine chemicals used during the production process. no waste and sludge pollutants result from manufacturing.

**Celtex Save Plus** allows to:

- **save energy**, more than 25% compared to conventional recycled products,
- save the environment as paper is certified **Ecolabel** and **PEFC** Recycled,
- **save money**, through extremely competitive pricing.

▶ **Celtex Tissue Flowers:** the sophisticated and elegant toilet paper with premium quality.

▶ **Celtex Megamini:** the Italian Design dispenser line for washroom area with a touch of style. Pure geometric shapes to grant functionality and grace to all restrooms.

▶ **Celtex Ubi Maior:** strong Carrara marble furnishing accessories designed to make every day action simple with a certain first-class touch. Michelangelo's favorite material is the inspiration of this luxury line that meets exclusive customer tastes.

**Infibra** provides ideas, solutions, and cutting edge fashion trends to enhance style, taste, and restaurateur imagination.

From **dressy tablecloths** to casual placemats and matching napkins, Infibra lines support on-trade markets to create **remarkable settings**.

The up-and-coming trend in specialist food shops and high street delis is filling a gap in the market place. The ever greater demand for street food complements the wide range of butcher shops, supermarket delicatessens, and food service outlets.

Delivering good quality to your customer is vital. The key is knowing which type of **food wrapping** paper to preserve freshness, ensure **safe handling**, and genuinely **benefit** the **end-user**.

**Temca** is recognized internationally level for quality, technology, continuous innovation in dispensing systems, **non-wovens**, and tissue product.

Specialized in cleaning and care solutions, Temdex, Profix, and Racon lines fulfill all end-users' specific needs in terms of efficiency in use, high product value, and time saving.

Finding the right product is essential to meet all different **industries**, such as **pharmaceutical**, chemical, **food**, glass, healthcare, printing, cleaning, and **automotive**.

## Certifications

EU Ecolabel, the ecological quality label that guarantees the respect of severe criteria for the protection of the environment required at a European level: low water and air pollution, low greenhouse gas emission and electricity use.

PEFC™, the forest certification that guarantees the correct environmental management of forest from which cellulose comes.

FSC® is a non-governmental international organization which promotes the responsible use of forestry resources.

ISEGA, the declaration of no objection for food industry. It guarantees the harmlessness of the certified product in contact with food and its packaging when used within the earmarked and correct usage.

Bio-degradability. Profix Super, Multi and Airsoft Product are bio-degradable: confirmation of bio-degradability of airlaid Product according to a certificate issued by LGA (Landesgewerbeanstalt Bayern), public corporation under legal supervision of the Bavarian State Ministry for Economic Affairs, Transport and Technology.

## “C” fold Hand Towels

	Product							
	code 70021 C LUX	Pure cellulose Micro-embossed	2	23 x 32 cm	152	20	3 040	40

## Embossings

**Leonida** and **Athena** embossings call to mind the elegant and classic Greek forms in a modern way.

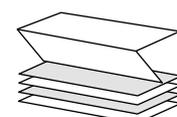

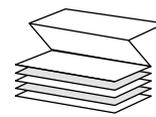

They improve hand towel paper performance conferring delicate softness, high absorbency and perfect strength. These features ensure effective performance, reduce consumption, and save money.

**Satin** embossing has the textile touch usually typical of TAD Product, giving the finished product its own specific strength, elasticity and easy handling.

As the latest exclusive embossing decoration for toilet paper, **Cotton Flowers** design evoke purity and softness. The textile decoration portrays cotton flower in bloom from flower to open boll. An outstanding softness quality that perfectly matches all requirements of washroom area.

## “V” fold Hydrosol Hand Towels

**Hydrosol**, the hand towel that dissolves in **9 seconds**.

The **original formula** of Celtex Hydrosol folded Hand Towel contributes to **prevent clogging** in public restroom plumbing systems.

**3-ply** hand towel to guarantee a **perfect drying** with a pleasant tactile feeling and quick absorption. If accidentally disposed in the toilet, Celtex Hydrosol hand towel will **dissolve in 9 seconds**, like Celtex toilet paper, avoiding any toilet clogging, waste of time and client complaints.

The typical light blue embossing distinguishes the product in the plumbing systems. Highly suggested for: beach establishments, camping, boat rents, and for all premises where the sink is near the toilet and users could dispose the hand towel in the WC.

## Flu Tech

Industrie Celtex's Research and Development department has developed an innovative Flu Tech formula for toilet paper and Hydrosol Hand Towels. Celtex Toilet Paper dissolves in 9 seconds, avoiding WC clogging, waste of time and client complaints. Highly suggested for: beach establishments, camping, boat rents, and for all premises where the sink is near the toilet and users could dispose the hand towel in the WC.

## Premium X Class Stainless steel Racon dispensers

The stainless steel dispenser and waste bin **Racon** line is a perfect addition for the sophisticated requirements of every washroom area that has to meet **hygienic standards**.

Its **timeless** elegant design guarantees the compatibility with every interior concept. The **high quality** is mainly characterized by the consistent high level of user comfort and low-maintenance for its entire life.

Our products are made of a corrosion and acid-resistant stainless steel WNr.1.4301 (X5CrNi18-10), AISI 304 (A2).

The material is **resistant** to water, vapor, humidity, food acids, light organic and inorganic acids and etc.

The clever construction is very user-friendly and allows a **quick replacement** of the filling materials.

The dispensers are made of very robust materials and are lockable. They offer at the same time an **effective protection** against theft and vandalism.

# Workplace Area

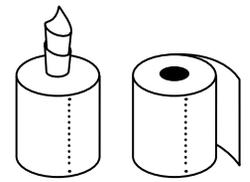

The complete range for specific use in mechanical industries, food area and professional cleaning.

A selection of industrial rolls and wipes guaranteed by Celtex and Profix brands, synonymous with quality tissue paper and high performance non-woven.

### “Performance” 2-ply Industrial Rolls

Celtex «Performance» line is realized with a particular selection of cellulose fibers to guarantee superior results in respect to classic tissue industrial rolls.

The wipe effect, characteristic of performance industrial rolls, renders maximum absorption and high resistance in all workplace applications.

The blue paper for dairy product

Celtex blue cellulose is suitable for dairy food contact.

Migration tests, conducted according to EN 646 regulation, demonstrate no color migration from paper to food product.

The blue colour is highly recognizable in all foods, facilitating removal.

## Airlaid wipes hygienic and reliable

Profix airlaid products are universally applicable and used predominantly in food industry, restaurants, hotels, laboratories, hospitals and nursing homes. Due to this special process, the wipes have an outstanding high **mechanical resistance** and an **extraordinary absorption**.

Because of the high quality of the extremely absorbant structure embossing and the **ISEGA certificate**, Profix airlaid wipes are qualified for **food contact**.

According to the certificate issued by **LGA** (Landesgewerbeamt Bayern), public corporation under legal supervision of the Bavarian State Ministry for Economic Affairs, Transport and Technology, Profix Airlaid Product are **bio-degradable** and **eco-friendly**.

## Profix Airsoft – Airlaid 100% Pure cellulose - white colour Grammage 70 g/m<sup>2</sup>

Soft, voluminous and robust **Airlaid-quality**, highly absorbant and tear-proof, even when wet.

High absorption rate, while **soft and handy**. The lightly embossed surface facilitates a very good cleaning **efficiency**.

For fast absorption of liquids and multi-purpose cleaning and wiping, in hospitals, nursing homes, industry, production plants, workshops, and food industry.

Bio-degradable

ISEGA-certificate

## Profix Super – Airlaid 100% Pure cellulose - white colour Grammage 70 g/m<sup>2</sup>

Thanks to its high grammage and **double-S-embossing** on **both sides**, Profix Super is voluminous and resistant to tears making it the perfect solution for users who require **softness**, rapid absorption, **ease of use**, and solidity even when wet.

Biodegradability and **ISEGA** certifications for food contact make it an ideal support for food and beverage preparation for hospital patients, and for the cleaning of food or glass surfaces and equipment.

Thanks to its **high absorption** of oil and resistance to solvents, Profix Super is the answer for production machinery and workshops to **absorb oils** and lubricants.

## Workplace Area | Airlaid Wipes

### Profix Tiger / Tiger Blue – Cellulose Grammage 77-83 g/m<sup>2</sup>

Sophisticated **double-creped** cellulose wipe for rapid absorption of large quantities of spilled liquids, **cleaning** and drying of hospital patients, and for **delicate surfaces** such as glass, ceramic, and stainless steel.

The wipe is specific for production machinery, **typographies**, carwash and workshops, artisanal businesses, and glass, **food** or pharmaceutical **industries**.

Profix Tiger and Tiger Blue are classified as “Double Re-Creped Cellulose” products, in other words the cellulose undergoes the production process twice, once on each side, giving it elevated absorption and softness.

Bio-degradable

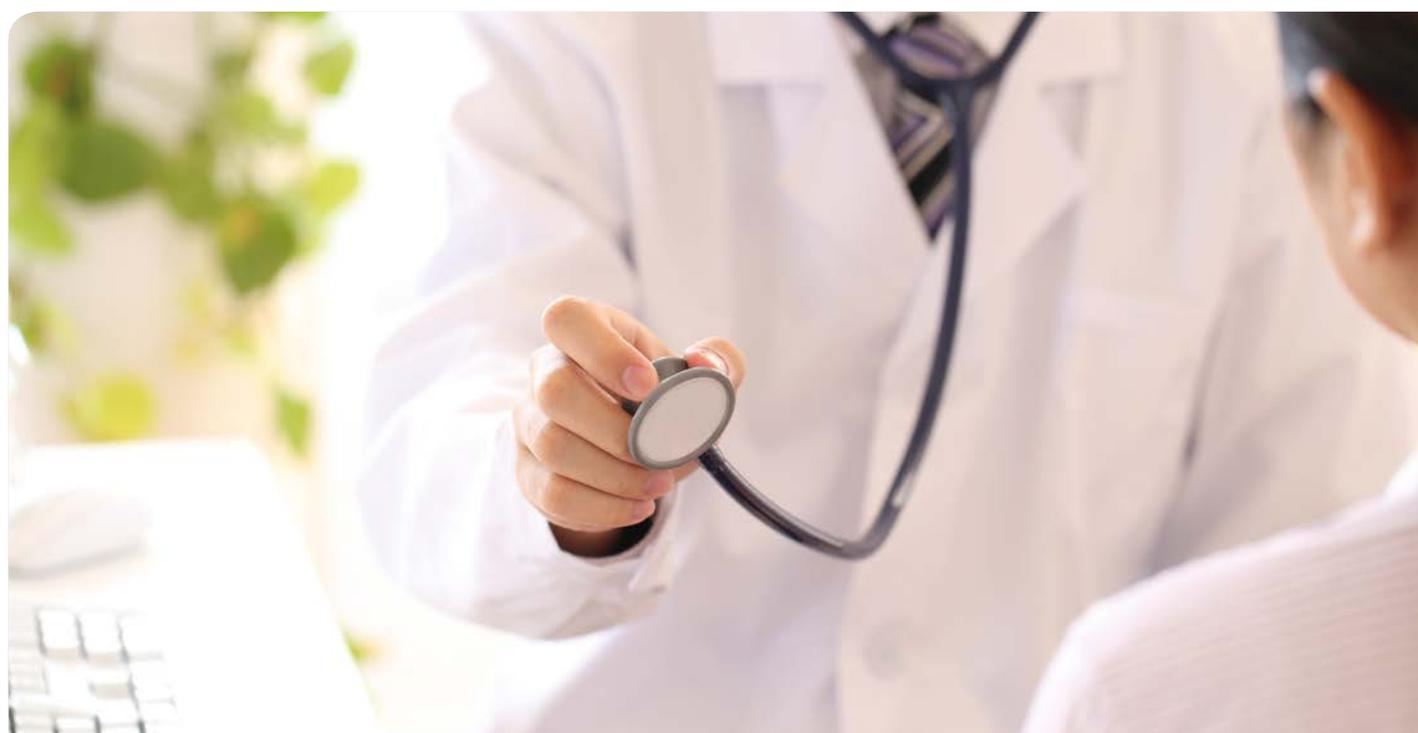

ISEGA-certificate

Lint-free

## Exceptional Performance Spunlace Wipes

Available in various compositions, different grammage and smooth or net structures, Profix Spunlace wipes combine high **absorption**, resistance and **softness** to ensure universal use.

Tear and **abrasion resistant**, suitable for both dry and wet use, Profix Spunlace is suitable for food contact (**ISEGA certification**).

### Profix Escon White / Print - 55% cellulose e 45% polyester Grammage 70-73 g/m<sup>2</sup>

Extremely tear-resistant, abrasion-proof and lint-free, the Profix Escon Wipe is produced from a mix of cellulose and smooth surface polyester. Available in **turquoise** or **white**, the wipe is highly absorbent resistant even under high mechanical stress. Resistant to solvents, wringable, and reusable makes it ideal for the pharmaceutical industry, bioengineering and precision mechanics.

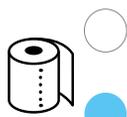

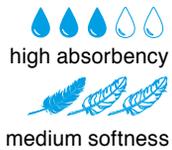

As a **degreasing wipe** it is suggested for the automobile and aviation industry, and for production machinery or workshops. As a **universal wipe** it is usable for laboratory hygiene, while permitting a **perfect lint-free** cleaning of printing cylinders in typographies.

### Profix Escon Power / Crêpé - 55% cellulose e 45% polyester Grammage 71-73 g/m<sup>2</sup>

The Power wipe version retains all the features of Escon White, while its **creped surface** improves liquid absorption.

The Escon Crêpé variant maintains the peculiarities of the Print wipe, but an added creped surface guarantees **increased resistance** to mechanical stress, faster liquid absorption rate, and softer tactile feeling.

## Spunlace

Spunlace wipes are characterized by their **unique quality** and softness, which only can be achieved by a complicated production process: single staple fibres are bonded and tied to each other by hydro jetting on a random layered **non-woven**.

**Profix Strong - Wipes in 60% cellulose e 40% polyester FSC® certified**  
**Grammage 70 g/m<sup>2</sup>**

**FSC®** certified non-woven, the Profix Strong wipe combines efficiency and **sustainability** for jobs in maintenance, automotive industry, mechanical precision, varnishing and painting, printing, and professional cleaning of buildings, public offices, kitchens and cafeterias.

**Voluminous** and **absorbent** produced with a mix of cellulose and polyester. The wipe is extremely soft, robust, lint-free, and tear-resistant even when wet. The **ecological** non-woven Profix Strong is wringable, versatile, and **reliable** for medium-heavy cleaning requirements.

## Highlights

When raising dairy cattle large losses are associated with the risk of bacterial mastitis spreading among cows.

The main source of contagion are milking machine parts, rags, and sponges to wash and dry udders and a milker's hands. By adopting strict **sanitation standards**, it is possible to contain bacteria.

As a disposable wipe, **Profix Strong** helps to **gently clean** and **dry cows**, effectively reducing the risk of spreading mastitis, and avoid cross-contamination between animals.

## Certification

- **FSC®** - certified product from responsible forest management.
- Gentle cleaning of all surfaces
- Extra high capacity
- Particularly powerful tear-resistant and durable

**FSC®** Certificate TEMCA GmbH states that the correspondingly marked products are **FSC®** certified and therefore the used components originate from sustainable wood production.

The mark of  
responsible forestry

# Workplace Area | Spunlace Wipes

## Profix 4C - 100% viscose wipes Grammage 75 g/m<sup>2</sup>

**FSC®** certified non-woven, the Profix Strong wipe combines **efficiency** and **sustainability** for jobs in maintenance, automotive industry, mechanical precision, varnishing and painting, printing, and professional cleaning of buildings, public offices, kitchens and cafeterias.

**Voluminous** and **absorbent** produced with a mix of cellulose and polyester. The wipe is extremely soft, robust, lint-free, and tear-resistant even when wet. The ecological non-woven **Profix Strong** is wringable, versatile, and reliable for medium-heavy cleaning requirements.

## Highlights

The **Profix 4 C system** ensures professional cleaning according to the color codes required by **HACCP regulation**.

For protection against external contamination, due to pathogenic factors or food processing accidents, food safety programs are increasingly emerging from the **Color Code**, an integral part of the HACCP system.

The main objective of Color Code is to ensure maximum hygiene and safety in various processing departments. Associating a different color for each tool or function used in a department minimizes the risk of cross contamination.

**Companies** that apply the Color Code programs have the following **advantages**:

- ▶ decreased risk of cross-contamination caused by pathogenic or allergenic agents;
- ▶ greater traceability of work tools;
- ▶ reduced complaints from workers.

Wipes for sanitation; e.g. toilet, urinal, etc.

Wipes for lavatories; e.g. mirror, sink, shelves.

Wipes for kitchen and canteen areas.

Wipes for general surfaces; e.g. bed, bedside tables etc.

## Workplace Area | Spunlace Wipes

### Profix Venet Light - 100% viscose with fine net structure Grammage 50 g/m<sup>2</sup>

Soft, light-weight, tear-resistant, and made out viscose fibers, the **Profix Venet Light** offers a good absorption capacity thanks to its fine net structure. As a universal **silicone-free wipe**, it is usable for cleaning in hospitals and nursing homes.

**Resistant to solvents**, ideal for polishing delicate surfaces and material in paint shops, automotive industry, and mechanical engineering. Particularly suggested in precision mechanics, printing and injecting, and auto shops.

Lint-free

## Profix Venet - 70% viscose and 30% polyester with net structure Grammage 65 g/m<sup>2</sup>

**Soft** and **absorbent non-woven** made from a robust mix of **viscose** and **polyester** fibers in a silicone-free net structure. Profix Venet is the multi-use tear resistant wipe for dry cleaning, or with water, in large professional kitchens and for cafeterias in medical or sanitary facilities.

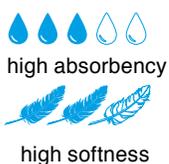

**Special solvent** resistant wipe indicated for use in the preparation and finishing phases of varnishing in industries of furniture, automobile, mechanical engineering, printing and injecting, auto shops and glass.

## Profix Venet Blue - 70% viscose and 30% polyester with net structure Grammage 65 g/m<sup>2</sup>

In the blue edition, the **Venet wipe** is used particularly for the drying of foods and general food-prep in cafeterias, hospitals, nursing homes and large professional kitchens.

**ISEGA certified** and used to clean with or without liquids, Profix Venet Plus is made from a mix of viscose and **blue polyester** to give the wipe tear and abrasion resistance, but conserving the high level of absorption and softness.

Thanks to its silicone-free and solvent-resistant net structure, Profix Venet Blue is **ideal for cleaning** flat surfaces in the automotive industry, printing and injecting, glass and food industry, and other preparations and final touches in painting industries.

# Ho.Re.Ca.

Industrie Celta complements professional activities in the Ho.Re.Ca. sector for every daily moment with tissue paper and non-woven products, and solution to wrap and conserve food.

Detailed research in the latest trends for creative ideas offers to pub and restaurant owners Celta and Infibra solutions for every need.

Infibra Collection Project is focused on research around the table, which from a simple detail of decor becomes the main element in harmony with restaurant furnishings.

## **Trend**

An elegant textile effect for every restaurant identity, a variety of table sets to grant disposable hygiene and colored decoration style.

## **Napkins**

Inspired by the weave and softness of the cloth, Infibra offers a wide range of napkins in pure cellulose, a benchmark of “Made in Italy” in the international market for variety of colours, dimensions and embossings. The touch quality and soft tactile feeling makes the napkin surface homogeneous and cloth-like.

## **Table Cloths**

Infibra reveals the secret of a perfect table: a single-use of excellence, like a business card for your establishment. Maximum quality control, a vast choice of colours and formats, and damasked motifs for an evocative game of lights and shadows. In addition, the possibility to personalize with logos, motifs, and decors allow a refined and original mise en place.

## Patient care and medical activity solutions

Where it comes to healthcare of people, the products must be efficient and of high quality. Every person deserves sensitive care when needed. Since nursing staff often has limited time, reliable and efficient equipment is a must to guarantee the highest hygiene.

**Disposable hygiene products**, dispensing systems, sanitizers and soap are the perfect solution to avoid cross-contamination and proliferation of virus and bacteria, as well as ensuring the well-being of the patient. Temca disposable products are a **functional response** for healthcare professionals, seeking reliable, effective and **quality solutions** to efficiently take care of people.

## Washing Gloves

Temdex Disposable **Washing Gloves** allow the sanitary staff to efficiently clean patients without irritating their skin and ensuring **maximum hygiene**.

To avoid transmission of germs the usage of disposable washing gloves for patients is highly recommended.

Temdex Washing Gloves **minimize laundry costs** and are hygienically efficient.

## Tissue health care wipes

Wherever liquids must be absorbed **fast** and **safely health care** wipes are being used. They are suitable for removal of ultrasonic gel, cleaning of patients or wiping.

Due to the surface structure of the wipes all dirt particles are safely absorbed. The highly absorptive tissue fibres ensure the **rapid absorption** of liquids.

Despite their **efficiency**, the towels are very **soft** and **skin-friendly**.

### Carry: protection sheets

In rescue service and emergency aid surfaces often need to be covered quickly and hygienically.

For this purpose **Temdex Carry** protection sheets are suitable. They offer safe **protection** against contamination and are used for covering mattresses, hospital beds and stretchers. The sheets are reinforced with an optional number of twines. The **absorbent** tissue takes fluids quickly and safely, the film lamination on the lower side protects against moisture penetration.

Product					
cod. 125 223 TEMDEX Carry 8	PE-laminated tissue	8-twins reinforced	80 × 210 cm	4 × 25 protection sheets	63
125 261 TEMDEX Carry 20	PE-laminated tissue	20-twins reinforced	100 × 200 cm	2 × 25 protection sheets	77

## Blankets and pillows

Whether in emergency aid, medical areas, in health care or in tourism – the practical **disposable blankets** and **pillows** are universally applicable. All white blankets are made of a breathable, **soft fleece** cover and a multilayer pulp core. The blue disposable blankets are filled with warming, re-used **wool**, which is surrounded by soft PP nonwoven.

To increase the endurance of the blankets and pillows, they are seamed on all sides and sewed. The blankets and pillows are **individually sealed** in polybags for hygienic reasons. They are suitable for **single use** and therefore are not washable.

## Bed sheets

**Temdex bed sheets** provide reliable protection of hospital beds and stretchers. The highly absorbent cellulose plies prevent wetting of mattresses and bed linen. They are used as an additional device in the **treatment of incontinence**, but also after surgery, as protective cover for wheelchairs and chair overlays.

The bed sheets are also suitable for bed-ridden patients, since they provide a very good feeling, do not disturb or cause bruising. Due to the **soft fleece** coating on top, the bed sheets are very comfortable in direct skin contact. The **highly absorbent** core seals liquids safely. The breathable bottom film prevents sheets from soaking.

## Filling procedure

1. Select the corresponding color removal system depending on the application. To protect the non-woven roll you have to wear gloves.
2. Remove roll from the packaging, cover unscrew cap from dispenser and insert dry roll. Pull the end from the roll center.
3. Pour the ready-to-use solution into the Temdex dispenser. Slowly pour the solution in spirals over the roll. Start in the center and go outwards to make sure the roll is completely moistened.
4. After about 10 minutes, the roll is saturated evenly and ready for use.
5. Roll out the first Temdex wipe from the centre through the opening of the dispenser system. Attach the lid to the bucket and turn it until it is closed. Close the lid of the dispenser carefully.
6. Mark the enclosed label properly and attach it to the dispenser.

## Disinfectant and soap systems

The **Temdex disinfectant** and **soap** systems with arm lever is one of few dispensers that are universally applicable in the **health** and **food sector**.

Intuitive handling and optimal dosage make it an indispensable device in **hygiene areas**.

- The dispenser is suitable for disinfectants, liquid soaps and thin lotions. It can be filled with all commercially available European bottles.
- The stainless steel pump and the dispenser are hot steam autoclavable (121° C at 1 bar pressure).
- The plastic pump is – in addition to that – suitable for disinfectant.

### Stainless Steel housing

The housing is made of brushed stainless steel. It is especially resistant to corrosion and extremely acid-proof. The surface is easy to clean and absolutely hygienic. The robust and long-lasting material is resistant to bacteria and viruses.

### Aluminium housing

The anodised aluminium housing has antiseptic properties and can be easily cleaned and sterilised. The material is resistant to wearing and corrosion. Due to its elegant metallic appearance the dispenser adds discreetly into the room concept. It is anti-bacterial, hygienic and resistant to corrosion due to the anodising process.

### Stainless steel operating lever

Due to the small contact area and the hygienic handling of the operating lever with the elbow (DGHM-Directive), the risk of contamination is reduced. The arm lever is available in a short and a long version.

cod. 119 970	Stainless steel	suitable for disinfectant dispenser 500 ml, to 40 mm tube diameter	1 units
cod. 119 987	Stainless steel	suitable for disinfectant dispenser 1 000 ml, to 40 mm tube diameter	1 units

Product			
cod. 124 295	aluminium plastic steel	<ul style="list-style-type: none"> <li>· stand</li> <li>· information frames (DIN A3)</li> <li>· Temdex disinfectant and soap dispenser 1 000 ml with long arm lever</li> <li>· lockable front panel</li> <li>· cup holder, (cup included)</li> </ul>	 WHD 500 × 1810 × 425mm 1 units

### Mobile disinfectant stand

- Mobile use in **highly frequented** areas
- Dispensers of antibacterial aluminium
- Long arm lever, **operated with elbow**
- Lockable front panel, with master key ("One-Key" system)
- Easier and faster change of bottles
- **Drip tray included** – avoids contamination of the immediate vicinity
- Information framework for important notes and news

### Disinfectant and soap dispenser

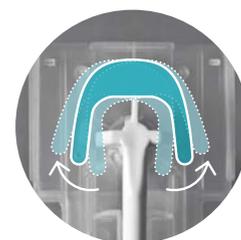

Compact disinfectant and soap dispensers made of shock-resistant ABS. Extremely robust, lockable and equipped with a drip pan. Can be disassembled and cleaned easily. The pumps can be replaced easily without tools.

### Spare pump

- With cranked suction pipe
- Dosage adjustable (approx. 0,8 ml / 1,2 ml / 1,8 ml per pass)
- Easier and faster change of bottle due to cranked pump

### Dispensers

# PROJECTS

Industrie Celtex continues their innovation process to benefit man, the environment, anticipating customer needs. E-Tissue, Megamini, and Ubi Maior are some examples of successful projects developed by R&D, a hub of ideas, design, and anticipation of tomorrow's client's demands.

## Celtex E-Tissue: the high performance environmentally-friendly paper.

The **premium quality recycled tissue** made from a special mix of converted **pure pulp trimmings** and **kraft fibres**. E-Tissue is a sustainable ecological line:

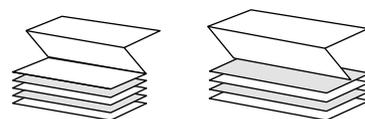

- ▶ **Ecolabel** and **PEFC** certified,
- ▶ **no bleaching** or chlorine chemicals used during the production process
- ▶ **no waste and sludge pollutants** from manufacturing harmful towards man or environment

The special formula for **E-Tissue** provides the finished product with:

- ▶ **extraordinary performance** in terms of absorption;
- ▶ strength and **wet resistance**;
- ▶ and **tactile softness**.

**Pleasant smell** even when wet, E-Tissue meets end-user expectations supporting the ecological choice of the premise owner.

08640 E-TISSUE CLEAN	2-ply - 200 sheets; Ø Rolls 14,2 cm; Ø spiral core 45 mm Sheet size: 25 x 22 cm; Roll length 50 m E-Tissue	1x12	40
32312 E-TISSUE PULL	2-ply - Ø Rolls 20 cm; Ø spiral core 72 mm; Sheet size: 20 cm; Roll length 108 m; E-Tissue	6	44

## Celtex Save Plus: the other way to save paper

Good quality and performance range of Product with a **whiteness** degree of **75%**. The paper mills exclusively use **prime quality** raw material, such as converting trimmings from pure pulp products.

This paper is ecological due to no bleaching or chlorine chemicals used during the production process. No polluting waste and sludge result from manufacturing.

**Celtex Save Plus** allows to:

- ▶ **save energy**, more than 25% compared to conventional recycled products,
- ▶ save the environment as paper is certified **Ecolabel** and **PEFC** Recycled,
- ▶ **save money**, through extremely competitive pricing.

### Toilet Paper

	Product			
	1010S Standard Toilet 10 Rolls	2-ply; 160 Sheets; Roll Length 17,6 m; Save Plus	10	21
