THE UNIQUE STYLE FOR YOUR TABLE SETTING

From stylish tablecloths
to casual place mats and matching napkins,
the **Infibra** collection offers
original solutions for a wide range
of table setting styles.

Artisanal know-how
and cutting-edge technology
combine with a creative approach to
colour and texture
to deliver original, on-trend
and eco-friendly products
that bring your décor vision
to life, whatever your venue's
style and look.

Tablecloths and cutlery bags
feature a special embossing
that is not only more
absorbent, but also creates a
more premium texture.

The practical “Hygiene
pack” maintains the napkin’s
maximum hygiene. Cutlery
bags are packaged in such
a way that the napkin is not
contaminated by external
agents, which also speeds up
cutlery’s insertion process.

Infibra napkins are suitable
for food contact.

THE VALUE OF BEING SUSTAINABLE

EU Ecolabel guarantees that products, throughout their entire life cycle, meet specific environmental performance criteria, common to all European Union countries.

The mark of
responsible forestry

FSC® certification, issued by the eponymous non-governmental international organization, promotes the responsible use of forest resources. Ask for our certified products.

Madre Terra products featuring the **OK compost INDUSTRIAL** label (based on European standard EN 13432) are guaranteed as compostable in an industrial composting plant.

Infibra respects the environment. **No plastics** are used in the production of our tablecloths and cutlery bags, meaning less impact on the environment and preservation of the sea from pollution, without compromising product performance.

THIS IS MY NATURE

Madre Terra is Infibra **100% ecological** product line.

Napkins are made from non-bleached*, non-treated cellulose, that is not derived from post-consumption or municipal solid waste.

This innovative solution recovers **cellulose fibres** that have never been used before, making the product **suitable for food contact**.

*No optical brighteners are intentionally added during our production process.

Madre Terra napkins are **EU Ecolabel** and **OK compost certified**. Paper is compostable and does not create new waste to dispose of, since it can be sorted with organic waste, turning even into new nourishment for the earth.

Madre Terra features neutral and delicate shades, typical of the natural colour of wood. The refined tone makes it ideal for any type of venue, decorating while respecting the environment.

SUSTAINABLE PRODUCTION, BENEFITS FOR THE ENVIRONMENT

Eco-friendly paper
from a sustainable
production chain

Natural colour,
free from added
optical brighteners*

Lower CO₂ emissions
during production**

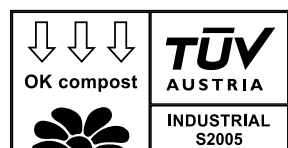

More sustainable
packaging. The film
for napkins is made
from recycled and
recyclable plastic

**Compared to pure pulp equivalent of Industrie Celtex.

VENUS

AIRLAI D

PREMIUM QUALITY IS SERVED

The **Venus** range of premium quality fabric-effect sets injects a note of striking, vibrant colour to the table.

Combining outstanding levels of hygiene and performance, **Venus** products are designed to deliver elegant décor in hospitality venues without the costs and time associated with laundering table linen.

BRINGING ECO-FRIENDLY ELEGANCE TO THE TABLE

The **Venus Airlaid** range is not just about aesthetics. Every piece is made from **compostable** paper that can be disposed of along with organic waste, reducing landfill and providing new nourishment for nature.

Venus products are also FSC®-certified, meaning that they are made from paper derived from responsibly-managed forests.
