LOC.TESO - MONTECARLO, 55015

Lucca

Sample tested:

Campione E-Tissue

This test report is related to the evaluation of irritant effects of cosmetic products when applied in single dose to the intact human skin. The supervision of these tests and the evaluations were carried out by medical staff. The evaluation of skin reactions is made 15 minutes and 24 hours after removal of the sample, according to the scale reported below. A 10x10mm paper sample was applied, after being moistened with a drop of liquid paraffin FU, on the skin of 10 volunteers, of both sex, who during the last month did not participate to any similar analogue test, are not affected by dermatitis, have no history of allergic skin reaction, are not under anti-inflammatory drug therapy. The women are not pregnant.

Table 1 - Summary legend of the scores given by the degree of reaction found

Evaluation skin reaction table		
Clinical parameter observed	Degree of reaction, score given	
ERYTHEMA	No evidence	0
	Minimal or uncertain erythema	0,5
	Light erythema (hardly visible)	1
	Clearly visible erythema	2
	Moderate erythema	3
	Serious erythema (dark red with arising eschars)	4
EDEMA	No edema	0
	Light edema (hardly visible)	1
	Clearly visible edema	2
	Moderate edema	3
	Strong edema (extended beyond the application area)	4

Table 2 - Classification based on the mean index of irritation (average)

Product classification	
Mean index of irritation	Classification
< 0,5	Non irritating
Between 0,5 and 1,0	Slightly irritating
Between 1,0 and 3,0	Moderately irritating
More than 3,0	Severe irritating

Table 3 - Results:

Evaluation after patch test removal	Mean index of irritation
Average value 15' after patch removal	0,00
Average value 24h after patch removal	0,00

Conclusions and judgment

The product tested, **Campione E-Tissue** produced by **CELTEX S.p.A.**, applied for 48 hours under occlusive conditions to the healthy skin of ten volunteers, considering the mean index of irritation identified as described in the tables above, it can be classified as **NON IRRITATING** when applied to human intact skin.
